Projects

EcoCollect – Waste Management System | Live | GitHub | *MongoDB, Express, ReactJS, NodeJS* **Aug 2025 – Dec 2025**

- Identified inefficiencies in manual waste collection, including delayed pickups, lack of real-time tracking, and ineffective waste segregation across multiple user groups.
- Designed a MERN-based full-stack web application to digitalize waste pickup requests, enable real-time status checking and support role-based dashboard for users and administrators.
- Implemented MongoDB for data storage to manage 100+ waste records, improving request processing efficiency by 40%, also reduced manual tracking errors through automated work-flows.

Stud-io – Virtual Study Website | GitHub | *HTML, CSS, JavaScript, PHP* **Feb 2025 - May 2025**

- Developed a virtual study website which helps the users to store notes, projects, flashcard, and a peaceful study environment to build focus.
- Included dynamic data from MySQL, responsive design, dynamic pagination based on data, and developer APIs for insertion, retrieval, deletion of data, user authentication, individual user data storage, and for other advanced tasks.
- Applied responsive web design knowledge successfully to create a fully functional full-stack website.

Training

Lovely Professional University **June 2025 - July 2025**

Basics pf DSA with CPP

- Completed structured summer training on C++ programming and core Data Structures & Algorithms, covering **arrays, linked lists, stacks, queues, heaps**, and priority-based problem solving.
- Built a command-line **Disaster Complaint Management System** enabling users to register complaints, assign priority scores, and track complaint resolution status efficiently.
- Utilized priority-based logic using **heap data structures** to resolve high-urgency complaints first, improving response handling accuracy and operational flow.
- Enabled users to view resolved and unresolved complaints separately, **ensuring transparency, effective tracking**, and better complaint lifecycle management.

Certificates

Build Generative AI Apps and Solutions with No-Code Tools **Aug 2025**

Infosys Springboard – ***Certificate Link***

ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM **Aug 2025**

Infosys Springboard **– *Certificate Link***

MongoDB Basics for Students **Jun 2025**

MongoDB University — ***Certificate Link***

Technical Skills

Languages C++, Java, JavaScript, C, PHP, Python

Technologies/Frameworks: React JS, Node JS, Express JS, Git, GitHub, Ubuntu

Skills: Problem-Solving, Adaptability, Flexibility

Education

Lovely Professional University Punjab **2023 – Present**

Computer Science and Engineering — CGPA: 8.13 *Phagwara, Punjab*

Paramount Academy **2021 – 2022**

12th with Science — Percentage: 76.8% *Muzaffarpur, Bihar*

Sr. Sec. Delhi Public School **2019 – 2020**

10th with Science — Percentage: 82.4% *Muzaffarpur, Bihar*
